This desert is the Queen's comfort dish. Her grandmother used to bake it for her and her sister on cold winter days when they were on holiday. It's a part of her identity.

This is not a bitter desert (~~lemon pie~~). It is soft and it has a fruity touch to it. Indeed, the fruits bring freshness and a slight crunchy texture to the dish. There's no chocolate taste. It's plain fruit (~~chocolate and pear pie~~). It's not so much a pie, but a real cake. It's made of a single variety of fruit. The fruits have no pits, but they have dark and small seeds. They can be red, yellow or green (~~cherry clafoutis).~~ It's not creamy but rather spongy (~~cheesecake~~).

Finally, it is important that it is not overcooked in the oven, because there shouldn't be any crunchy or crispy layer at the top (~~apple crumble~~). The top of the cake should show the shape of the fruits that have been chopped in slices. It should be slightly brown.

Answer: the apple cake.
